

Matemātikas uzdevumi #1 – atbildes

1. **15** - pieaugums 12 €, kas ir $12/80 \times 100 = 15\%$.

2. **108** - platums $12 \times 0,75 = 9$; laukums 12×9 .

3. **168** - $480 \times 0,35 = 168$.

4. **367** - $360 \times 0,85 = 306$; $306 \times 1,2 \approx 367$.

5. **10** - $\sqrt{6^2 + 8^2} = \sqrt{100} = 10$.

6. **13500** - $750 \times 18 = 13500$.

7. **20** - $420 \div 7 = 60$; $60 \div 3 = 20$.

8. **17** - perimetrs: $a + b = 27$; $27 - 10 = 17$.

9. **660** - reklāma 540; $1200 - 540 = 660$.

10. **12** - atisina 36; $48 - 36 = 12$.

11. **42** - $C = 2 \times 3 \times 7 = 42$.

12. **33** - $(20 + 25 + x) = 78$; $x = 33$.
